Amino Acid Analyser (SYKAM) including training; cool reagent storage: All buffer solutions, as well as the Ninhydrine reagent are stored under Inert gas pressure, integrated Auto sampler: Volumes from 1ul to 100ul can be injected without any loss of sample, capacity for 120 vial In a cooled sample tray is available, Programmable column Oven: A programmable solid state column oven with fast heating and cooling capability with a temperature range from +5°C to +85°C Independent of the ambient temperature is fitted as standard on the analyser.	8-Weeks	TETF/UNIV/OWERRI/ZN/18/01	49,420,998.00		December 12, 2019	On-going
					Supply, Testing and commissioning of 1Nr. Gas Chromatography Mass Spectrophotometer (GCMS) TQ8040 including training; In combination with this database, the GCMS- TQ8040 can be used as a system specialized for the analysis of residual pesticides in foods. This product covers approximately 480 pesticide components used worldwide. Furthermore, It can be customized to suit GC conditions not configured in the database, or to suit additional registration of new compound information. In addition, the smart MRM function allows automatic creation of analysis methods, thereby reducing the costs and time associated with analysis.	8-Weeks	TETF/UNIV/OWERRI/ZN/18/02	49,197,800.00
